

NOVEMBER 2018, STAGE 2: BUZZ THE TOWER!

BRIEF:

Facing down range, standing in position #1 with toes touching and straddling start stick one, or standing in position #3 with heels touching and straddling start stick two. Hands relaxed at sides, handgun loaded and holstered.

Engage a single target from your start position, then one foot must touch the ground from position #2 while engaging another single target. Finally, one foot must exit the middle position and step beyond the remaining start stick to engage the final target from the remaining position. The shooter's feet must not touch anything beyond the area delineated by the start sticks when engaging a target from any position. That area extends from the leading or trailing edge of the start stick itself to infinity.

Restricted format: no makeups. Best two hits on paper score, the middle target must be scored from the a-zone only. If using metric targets, the middle target must be scored **from the headbox only**.

FAQ:

- > The distance from start stick one to the middle target is 39 feet.
- > The outside targets present on a parallel, 22.5 feet center to center from the middle target.
- > Starting sticks are approximately 6" pieces of 2"x3" board
- > Camera should be placed behind and to the right of the shooter
- > Check your camera before shooting-- make sure the targets are all in frame, and that it matches our online video and guide
- > Video should be a single take from the timer start signal until the targets have been scored in front of the camera
- > Say your score out-loud as you present your targets to the camera
- > Video should be shot in daylight conditions
- > To answer any further questions, please see Rule #3
